

# MISS RABBIT

Bandbio

**“Oh my god, why didn’t you stop us?!”**

A quote from the bassist after watching a live video from 2010, when the band was founded and the girls played cheesy cover songs in cute outfits.

But those times are definitely over. After each album, the logo and the sound of the band got harder. Miss Rabbit now have 10 years, three albums and various concerts in all German-speaking countries covered. Their self-discovery phase is complete and everyone knows how the wind blows.

The third album “Call Us And We Follow” is loud and direct. Great technology and effects are avoided because nobody has a clue about it anyway. As a result, Miss Rabbit sound straight forward and authentic in the studio as well as on stage.
